

Drawing Line Segments with a Given Gradient

1	Starting at the point $(0, 2)$, draw a line segment with gradient 1
2	Starting at the point $(16, 12)$, draw a line segment with gradient -2
3	Starting at the point $(0, 0)$, draw a line segment with gradient $\frac{1}{3}$
4	Starting at the point $(5, 6)$, draw a line segment with gradient $\frac{3}{4}$
5	Starting at the point $(1, 11)$, draw a line segment with gradient -4
6	Starting at the point $(3, 10)$, draw a line segment with gradient 0
7	Starting at the point $(9, 1)$, draw a line segment with gradient $\frac{5}{3}$
8	Starting at the point $(12, 9)$, draw a line segment with gradient $-\frac{1}{2}$
9	Starting at the point $(15, 5)$, draw a line segment with gradient $-\frac{4}{5}$
10	Starting at the point $(10, 0)$, draw a line segment with gradient $\frac{2}{7}$
