

# Fill In The Blanks...

## Evaluating Two-Step Functions

| Question                                  | Input | Function Machine | Output       |
|---|-------|------------------|--------------|
| $f(x) = 2x - 1$<br>Find $f(5)$            | 5 →   | × 2 →            | -1 →         |
| $f(x) = 4x + 3$<br>Find $f(-3)$           | →     | × 4 →            | +3 →         |
| $f(x) = x^2 - 5$<br>Find $f(4)$           | →     | square →         | →            |
| $g(x) = \frac{x+3}{2}$<br>Find $g(11)$    | →     | →                | ÷ 2 →        |
| $f(x) = \sqrt{x+5}$<br>Find $f(4)$        | →     | →                | →            |
| $f(x) = \frac{x}{2} + 1$<br>Find $f(2.5)$ | →     | →                | →            |
| $f(x) = 3(x+2)$<br>Find $f(-7)$           | →     | →                | →            |
| $h(x) = (x+3)^2$<br>Find $h(-5)$          | →     | +3 →             | →            |
| $f(x) = 4x^2$<br>Find $f(\sqrt{3})$       | →     | square →         | →            |
| $f(x) = \frac{1}{x} + 9$<br>Find $f(2)$   | →     | →                | →            |
| $f(x) =$<br>Find                          | 10 →  | -1 →             | ÷ 3 →        |
| $f(x) =$<br>Find                          | -7 →  | +2 →             | reciprocal → |
