| A bag contains 6 red sweets, 5 orange sweets and 3 yellow sweets. Find the probability of choosing an orange sweet at random from the bag.   | A fair six-sided spinner is numbered 1 to 6. The spinner is spun once. Find the probability that the spinner lands on a multiple of 3.  | There are 10 balls in a bag. 7 of the balls are red and the rest are yellow. When a ball is picked from the bag at random, what is the probability that it is blue? | There are 5 white counters, 8 black counters and 7 grey counters in a bag. A counter is chosen at random. What is the probability that it is not white? |          |          |          |          |          |             |     |      |     |     |          |  |   |  |  |          |  |  |  |    |          |  |  |  |  |
| <b>(e)</b>   | <b>(f)</b>  | <b>(g)</b>  |   |          |          |          |          |          |             |     |      |     |     |          |  |   |  |  |          |  |  |  |    |          |  |  |  |  |
| A purse contains 20 coins. They are either 10p or 5p coins. The probability of choosing a 5p coin at random is 0.4. How many 10p coins are in the purse?   | Zack rolls a biased dice. The probability that it lands on each of the numbers 1 to 4 is shown in the table. The dice is twice as likely to land on a 5 as it is to land on a 6. Complete the table.<br><br><table border="1" style="margin-left: auto; margin-right: auto; border-collapse: collapse; text-align: center;"> <tr> <td>Number</td> <td>1</td> <td>2</td> <td>3</td> <td>4</td> <td>5</td> <td>6</td> </tr> <tr> <td>Probability</td> <td>0.2</td> <td>0.05</td> <td>0.1</td> <td>0.2</td> <td></td> <td></td> </tr> </table> | Number  | 1   | 2        | 3        | 4        | 5        | 6        | Probability | 0.2 | 0.05 | 0.1 | 0.2 |          |  | The probability that a biased spinner lands on a 2 is 0.3. Jemima spins the spinner 150 times. Work out an estimate for the number of times the spinner will land on a 2. |  |  |          |  |  |  |    |          |  |  |  |  |
| Number   | 1   | 2   | 3   | 4        | 5        | 6        |          |          |             |     |      |     |     |          |  |   |  |  |          |  |  |  |    |          |  |  |  |  |

| <b>(i)</b>   | <b>(k)</b>  |   |   |          |          |          |          |          |             |     |      |     |     |          |  |   |  |  |          |  |  |  |    |          |  |  |  |  |
| Leon has a fair four-sided spinner containing the numbers 1, 3, 5 and 7. He spins it twice and adds the two numbers together to get a total.<br>(a) Complete the sample space.<br>(b) Calculate the probability of Leon getting a total of 10 or more. | <table border="1" style="margin-left: auto; margin-right: auto; border-collapse: collapse; text-align: center;"> <tr> <td></td> <td><b>1</b></td> <td><b>3</b></td> <td><b>5</b></td> <td><b>7</b></td> </tr> <tr> <td><b>1</b></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td><b>3</b></td> <td></td> <td>6</td> <td></td> <td></td> </tr> <tr> <td><b>5</b></td> <td></td> <td></td> <td></td> <td>12</td> </tr> <tr> <td><b>7</b></td> <td></td> <td></td> <td></td> <td></td> </tr> </table>                               |   |   |          | <b>1</b> | <b>3</b> | <b>5</b> | <b>7</b> | <b>1</b>    |     |      |     |     | <b>3</b> |  | 6   |  |  | <b>5</b> |  |  |  | 12 | <b>7</b> |  |  |  |  |
|  | <b>1</b>  | <b>3</b>  | <b>5</b>  | <b>7</b> |          |          |          |          |             |     |      |     |     |          |  |   |  |  |          |  |  |  |    |          |  |  |  |  |
| <b>1</b>   |   |   |   |          |          |          |          |          |             |     |      |     |     |          |  |   |  |  |          |  |  |  |    |          |  |  |  |  |
| <b>3</b>   |   | 6   |   |          |          |          |          |          |             |     |      |     |     |          |  |   |  |  |          |  |  |  |    |          |  |  |  |  |
| <b>5</b>   |   |   |   | 12       |          |          |          |          |             |     |      |     |     |          |  |   |  |  |          |  |  |  |    |          |  |  |  |  |

| A bag contains 12 red counters and 6 blue counters. Some more blue counters are added to the bag, so that the probability of choosing a blue counter is now $\frac{3}{7}$ . How many blue counters have been added to the bag?                         |   |   |   |          |          |          |          |          |             |     |      |     |     |          |  |   |  |  |          |  |  |  |    |          |  |  |  |  |
